

Nithin Arisetty

Data Analyst | AI & Analytics

Data Analyst with experience delivering large-scale analytics solutions at Amazon, specialising in SQL, Python, and scalable data systems. Proven ability to analyse high-volume datasets, detect anomalies, and develop data-driven frameworks that improve performance. Experienced in hypothesis testing, risk analysis, and building AI-powered analytics applications using LLMs to automate insights. Strong track record of solving complex business problems and influencing stakeholders through data-driven recommendations.

CORE SKILLS

SQL (CTEs, Window Functions)

Python(Pandas, NumPy)

AWS (S3, Redshift, Athena)

Large-Scale Data Analysis & Exploration

Anomaly Detection & Pattern Analysis

Hypothesis Testing & Statistical Analysis

KPI & Risk Metric Development

Agile Collaboration

WORK EXPERIENCE

Senior BI Analyst – Business Analytics

Amazon UK

10/2025 - Present

London, United Kingdom

Official title: Logistics Scheduler; scope expanded into advanced SQL analytics, Python-based data analysis, and AWS-backed reporting for leadership decision support.

Role Achievements & Business Impact:

- Accomplished large-scale operational analytics delivery across €80M+ logistics network as measured by ~30% faster decision turnaround by translating requirements from 10+ stakeholders into scalable SQL/Python solutions and KPI frameworks
- Accomplished early detection of operational risks and anomalies as measured by identifying 15+ high-impact scenarios by analysing millions of records and developing risk-based analytical models
- Accomplished improved reporting reliability and data governance as measured by ~25% reduction in discrepancies by validating upstream/downstream dependencies and implementing structured data quality checks
- Accomplished scalable analytics infrastructure development as measured by supporting 50+ KPIs across 5+ regions by designing Power BI models, SQL pipelines, and reusable datasets
- Accomplished faster insight generation and automation as measured by ~40% reduction in manual analysis effort by building Python-based data processing and analytical workflows
- Accomplished hypothesis-driven performance optimisation as measured by ~5–10% improvement in key operational KPIs by conducting statistical analysis and validating performance drivers
- Accomplished cross-functional delivery efficiency as measured by ~35% faster issue resolution by collaborating with 3–4 teams to translate business problems into analytical solutions

Business Intelligence Analyst – Operations Analytics

Amazon UK

09/2023 - 09/2025

Milton Keynes, United Kingdom

Official title: Sortation Associate; scope included SQL- and Python-based analysis, BI dashboards, and operational performance insights.

Role Achievements & Business Impact:

- Accomplished data-driven decision support across 2M+ weekly records as measured by influencing planning outcomes by translating stakeholder requirements into SQL-based analytical solutions
- Accomplished increased dashboard adoption and business usage as measured by ~40% improvement by designing intuitive BI visualisations aligned with stakeholder needs
- Accomplished improved data accuracy and consistency as measured by ~30% reduction in reporting errors by performing validation, reconciliation, and functional testing across datasets
- Accomplished faster analytics delivery cycles as measured by ~25% reduction in turnaround time by implementing iterative feedback loops and agile delivery practices
- Accomplished operational performance improvements as measured by ~5–10% uplift in key KPIs by identifying inefficiencies and translating insights into actionable recommendations
- Accomplished structured analytical problem-solving as measured by consistent stakeholder sign-offs by aligning outputs with business expectations through validation and review sessions

GITHUB ANALYTICS PORTFOLIO

Customer Intelligence Copilot (AI-Powered Analytics Application)

<https://github.com/arissettynithin-maker/customer-intelligence-copilot.git>

- Accomplished development of an AI-powered analytics application as measured by processing 100K+ customer data points by integrating Python-based analytics with LLM-driven insight generation
- Accomplished advanced pattern and anomaly detection as measured by identifying behavioural trends and high-risk customer segments through analytical pipelines
- Accomplished end-to-end analytics workflow design as measured by building modular pipelines for data ingestion, transformation, EDA, and reporting

E-commerce Lifecycle Analytics (2M+ Events)

<https://github.com/arissettynithin-maker/Ecommerce-Lifecycle-Analytics.git>

- Analysed ~ 2 million e-commerce user events to understand customer behaviour, funnel conversion, and retention patterns.
- Implemented SQL analysis, Python data processing, and Power BI dashboards to surface lifecycle insights.
- Identified key drop-off points in the purchase funnel and high-value customer segments.

EDUCATION

MSc in Finance and Management

Cranfield University, United Kingdom

09/2022 - 09/2023

Key Academic Highlights:

- Strong focus on statistical analysis, financial modelling, and applied research, with exposure to credit risk, fixed income analytics, and regulatory frameworks.

Bachelor of Business Administration (Finance)

Christ University, India

06/2018 - 06/2021

Key Academic Highlights:

- Built a solid quantitative and analytical foundation through coursework in business statistics, financial risk management, and market analysis.

SOFT SKILLS

Analytical Problem Solving

Data-Driven Decision Making

Stakeholder Management & Cross-Functional Collaboration

Strategic Thinking & Business Impact Orientation

Process Optimisation & Automation Mindset
